NATIONAL FEDERATION OF COOPERATIVE SUGAR FACTORIES LTD. (NFCSF)

Activities of the National Federation of Cooperative Sugar Factories Limited during 2018-19

The National Federation of Cooperative Sugar Factories Limited (NFCSF) was established in 1960 to coordinate and facilitate the working of the affiliated cooperative sugar factories and State Federations of cooperative sugar factories and to assist in the promotion and installation of new cooperative sugar factories. The NFCSF was established at a time when India's standing in the world sugar scenario was negligible. However, the establishment of NFCSF changed the scenario. There was a steady increase in total sugar production and also the cooperative share in the total production. During the year 1982, 1988 to 1993, 1995, 1996 & 2000 India had achieved the distinction of becoming the world's largest producer of sugar, and the share of the cooperatives in total sugar production was between 55% to 61%. As on March 31, 2019, there were 743 installed sugar factories, of which 283 are in the cooperative sector.

During the last two years, India has witnessed a glut in sugar production. The domestic sugar production in 2018-19 recorded an all time high sugar production of 330 lakh tonnes by surpassing all production estimates. In the world market, there was surplus sugar production in these years. Domestic as well as world sugar prices were ruling well below the cost of production

of sugar. Due to the huge disparity between domestic prices and rock bottom international prices, India's export business became unviable. After the introduction of minimum selling prices (MSP) of sugar of Rs 29/kg (Increased to Rs 31/ Kg w.e.f. from 14-02-2019), which is still below cost of production; the sugar factories which were trapped in the financial crisis and were not able to clear their cane price dues to farmers, received some respite. As on June 30, 2019, cane price arrears are still at a high level.

In order to improve the liquidity of sugar mills enabling them to clear cane price arrears of farmers and to stabilize domestic sugar price, Government took various corrective measures, as follows.

Minimum Selling Price (MSP): Government of India (GoI) fixed the minimum selling price of Rs. 29/-kg. of white / refined sugar at mill gate, which was later increased by Rs. 2/- per kg to Rs 31/- Per Kg w.e.f from 14-02-2019. No sugar mills are able to sell their inventory below MSP, which helps in reducing the mounting cane arrears and improving the liquidity position of the sugar mills.

Minimum Indicative Export quota of 50 Lmts : To reduce the Inventory level in India and improve the Cash inflow of sugar millers, GoI allowed export of 50 LMT of sugar under sugar mill wise minimum indicative export quota (MIEQ) scheme for the year 2018-19.

Financial Incentive on Cane Crushed : In order to offset the cost of cane & facilitate timely payment of cane price dues of sugarcane growers, GoI notified financial incentive on cane crushed during SS 2018-19. Under this scheme, financial assistance shall be available @ Rs. 13.80 per/ qtl. of cane crushed for the production of sugar. The estimated expenditure to be incurred by government for this purpose will be Rs. 4163 crores.

Financial Assistance on Sugar Export : In order to facilitate export of sugar during sugar season 2018-19, thereby improving the liquidity position of sugar mills and clearing cane price dues of sugarcane growers, GoI notified the scheme for defraying expenditure towards internal transport, freight, handling & other charges on export. Exporting sugar by sugar mills is eligible

for @ Rs. 1000/MT for the mills located within 100 kms from the ports, @ Rs. 2500/MT for the mills located beyond 100 kms from the port in the coastal states and @ Rs. 3000/MT for mills located in other than coastal states or actual expenditure, whichever is lower. The total expenditure on this account would be about Rs.1375 crore, which will be borne by the Government.

Scheme for Extending Soft Loan to Sugar Mills: The purpose of this loan scheme is to help millers clear the sugarcane payment arrears relating to the Fair and Remunerative Price (FRP) of sugarcane fixed by GoI. The total interest subvention on this account would be about Rs.750 crores, which will be borne by the Government. Under this scheme, the Government will bear the interest subvention cost @ 7% simple interest or actual rate of interest charged by the bank, whichever is less, for one year, from the date of disbursement of the loan.

Financial Assistance to Sugar Mills for Enhancement and Augmentation of Ethanol Production Capacity: In order to increase the production of Ethanol and its supply under Ethanol Blended with Petrol (EBP) programme, thereby improving the liquidity position of sugar mills, enabling them to clear cane price arrears of the farmers as well as achieve the target of 10% EBP by 2022 & 20% EBP by 2030, the GOI has notified this scheme. Under this scheme, Maximum Interest Subvention is @ 6% available for five years for sugar millers, which is also extended to standalone distilleries. (In principle approval was accorded by Government for extending soft loans of about Rs. 9106 crores to 174 sugar mills under the Scheme. The impact due to this Scheme is EBP increased from 4.2 % to 7% in Ethanol Season 2018-19.

Besides the above, NFCSF continued to render its techno-commercial consultancy services to its member cooperative sugar factories and to the need-based private sector mills. The professional experts of NFCSF in various disciplines viz. Sugar Engineering, Sugar Technology, Sugarcane Agronomy, Financial Management, By-Products have helped member sugar factories to adopt new technologies and methods for cost effective production of sugarcane and effective utilization of by-products

of the industry, for value addition. The technical competence, financial acumen, excellent skills and professional interfacing of the experts of NFCSF helped the member sugar factories to meet new challenges and the ever rising global standards. Emphasis was laid on the vertical growth of production of the factories rather than horizontal growth. Accordingly, the projects undertaken during the year, pertained more to expansion of crushing capacities, modernization, cogeneration, effective utilisation of by-products i.e. ethanol from sugarcane, juice etc.

During the year, NFCSF undertook 74 projects in nine States in India. These projects were related to preparation of rehabilitation, modernization, expansion, co-generation and valuation project reports and detailed project reports and project reports for ten distillery projects. The Detailed Project Reports included cane development programme, valuation of existing plants and recommendations for up gradation and modernization of technology, co-generation, machinery specifications, financial restructuring, means of financing pattern and viability analysis etc. During the year total techno-commercial consultancy and inspection services from concept to commissioning were also provided.

As sugarcane is the backbone of the sugar industry and as varieties of sugarcane play a major role not only in increasing sugarcane productivity but also sugar recovery; in order to improve the productivity of sugarcane, NFCSF had constituted a Committee under the Chairmanship of the Managing Director, NFCSF. This Committee has been monitoring the varietal trials conducted in different cooperative sugar factory operational areas.

The Federation also organized a National Seminar on '*Challenges to Deliver Sustainability in the Indian Sugarcane Industry*' in March, 2019 at Pune. The seminar was organised in view of NFCSF's continued emphasis on cost effective production of sugar cane, sugar and effective utilization of by-products in order to make the Indian sugar industry globally competitive. Leading sugar scientists, academicians, sugar technologists, policy makers, officers of cooperative and private sugar factories, sugar

federations and associations from across the country participated in the seminar.

During the year, NFCSF continued to publish its regular publications viz. '*Cooperative Sugar Press News*' weekly magazine containing present reports on sugar and allied subjects, Parliament questions and answers, market reports and '*Cooperative Sugar*' a monthly journal containing useful technical articles on sugarcane, sugar and their by-products and government orders, notifications and statistical information. Various articles on cooperatives and success stories of cooperatives are also published. NFCSF also maintained close contact with media during the year to make the public and journalists aware of the problems faced by the sugar industry and to highlight the achievements of the sugar industry.

**NATIONAL COOPERATIVE AGRICULTURE
AND RURAL DEVELOPMENT BANKS'
FEDERATION LTD. (NCARDB)**

A significant event in the history of Long Term Cooperative Credit Structure (LTCCS) in India has been the establishment of the National Cooperative Agriculture and Rural Development Banks' Federation Ltd (NCARDBF) in 1960. Since its inception, the Federation has been playing an important role in the growth of institutions in the sector. It has established effective coordination

and promoted understanding among member banks and liaison with Central and State Governments, NABARD and financing agencies of SCARDBs.

Lobbying with the Government for implementing revival package comprising of recapitalisation and reforms, guiding SCARDBs in self-driven reform initiatives and guidance and support to member banks in resource mobilization, recovery and NPA management, business expansion and diversification continued to be the thrust areas of Federation's activities during the year.

Revival Package for ARDBs

Demand for revival package has been the main focus of Federation's lobbying with Central Govt in the last few years. Federation has been taking up this matter with various authorities in the Government including Prime Minister and Finance Minister from time to time. Federation has also convened Meetings of Parliamentarians on this issue. Federation has submitted fresh memorandum on this issue to Hon'ble Prime Minister in the eve of this year's Union Budget pointing out the need to revive institutions in the long term cooperative credit structure to boost capital formation in agriculture and to address the credit crisis faced by their member farmers.

The delay in implementing the package aggravated financial weakness of ARDBs and drastically reduced their capacity to meet the credit requirements of about 98 lakh farmers (members of ARDBs with outstanding loans as on 31.3.2017) who by and large are unable to access credit from other agencies since their land is already mortgaged with ARDBs. Implementation of the proposed revival package is the only solution to address credit crisis faced by them. The structure which is present in all major states with a network of 2600 outlets has the potential of expanding its annual lending at least by 5 times in the short run from the present level of about Rs.5000 crs, if revived.

The continuous representations and delegations keep the revival proposal live and the Federation hopes for a favourable decision on the same at political level.

Restructuring of ARDBs into Banks

There is consensus among institutions in the LTCCS as well as their stakeholders including State Govt and NABARD that ARDBs should be converted as regular banks to make them resource based institutions capable of meeting the credit needs of their members adequately and restoring its relevance in the rural financial system.

In response to Federation's various representations on the subject, RBI has recently informed that the suggestion of framing norms for licensing ARDBs as banks is under consideration.

Crop loan interest subvention scheme

The interest subvention scheme for crop loans implemented by Govt of India is presently not extended to farmers who avail crop loans from ARDBs, for which the Federation has been persistently taking up this matter with Ministry of Finance to address this issue. NABARD Chairman in his meeting with representatives of the Federation on 6th March 2019 informed that such a proposal is under its active consideration which, if implemented, will help SCARDBs to give crop loans to their long term borrowers at interest rates on par with other banks. Federation has also moved Government to introduce an interest subvention scheme for investment credit to agriculture in the pattern of crop loan interest subvention scheme in order to reduce the cost of long term loans for capital formation in agriculture.

Reform initiatives

Core Group for Reform Initiatives (CGRI)

Core Group for Reform Initiatives constituted by SCARDBs continue to have regular meetings in most of the banks. CGRI has been concentrating on deepening of self-driven reforms at the ground level and also reviewing the impact of reforms.

The focus of CGRI meetings during 2018-19 was preparation and implementation of special revival plans by SCARDBs with thrust on resource augmentation, business expansion, NPA management and computerisation.

Follow-up with State Governments for enhancing policy support to SCARDBs

The two Conferences of Principal Secretaries

of Cooperation and Registrars of Cooperative Societies organised by the Federation in 2012 and 2014 made several important recommendations for improving legal and policy environment of ARDBs and improving their working in general. The Federation is continuously following up these recommendations with State Govts concerned.

Scheme for Sanctioning Supplementary Credit Limit to meet Short term credit needs of long term borrowers

Absence of further financial support to supplement investment credit is a major shortcoming in the working of ARDBs. ARDBs generally give only long term loans leaving the short term credit needs of their members unattended and making them dependent on informal sources for such credit at exorbitant interest rates. Inadequate availability of short term credit also leads to sub-optimum utilisation of long term assets financed by ARDBs which affects borrowers' income and repaying capacity. Further, high cost of informal credit reduces the capacity of members to repay loans availed from the bank. Frequent contact of the borrower with the bank is necessary for timely repayment of loan is also not possible in the absence of further credit support after issuing investment credit.

Fixing supplementary credit limit which can be operated like a revolving cash credit to borrowers of long term loans will serve the twin purpose of meeting short term credit needs and improving loan recovery by increased borrower contact and reduced dependence of borrowers on informal sources of credit.

Working Group on Enhancing the Share of ARDBs in Rural Credit

Background

The ARDB structure is experiencing drastic decline in their market share since mid late 90s. Financial weaknesses on account of losses incurred under govt sponsored lending programmes, debt waivers as well as inadequate margins under the regulated interest rate regime prevailing till mid 90s. Continuing dependence on NABARD's refinance and failure to diversify source of funds. Drastic increase in the level of overdues and NPAs since early 2000, etc. Are some of the important reasons behind this.

As decided by the Board of Management of the Federation in its meeting on 21st July 2017, Chairman Federation has constituted a Working Group on enhancing the share of ARDBs in rural credit with focus on investment credit to agriculture under the Chairmanship of Shri Y.C. Nanda, Ex-Chairman, NABARD and Co-Chairmanship of Shri D.N. Thakur, Dy. Managing Director, NCDC, one officer from NABARD and Chairmen/CEOs of Member Banks.

environment, windmills which were installed in 2008-09 (1 unit) and 2011-12 (2 units) continue to yield good results.
